Consideration of other advice

- **Ventilation requirements** : Use local and general ventilation.
- **Specific designs for storage rooms or vessels** : Recommended storage temperature: 15 - 25 °C.

7.3 Specific end use(s)

No information available.

SECTION 8: Exposure controls/personal protection

8.1	Control parameters
	National limit values
	Occupational exposure limit values (Workplace Exposure Limits)
	Data are not available.
8.2	Exposure controls
	Individual protection measures (personal protective equipment)
	Eye/face protection

Use safety goggle with side protection.

Skin protection

- **Hand protection** : Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. The times are approximate values from measurements at 22 °C and permanent contact. Increased temperatures due to heated substances, body heat etc. and a reduction of the effective layer thickness by stretching can lead to a considerable reduction of the breakthrough time. If in doubt, contact manufacturer. At an approx. 1.5 times larger / smaller layer thickness, the respective breakthrough time is doubled / halved. The data apply only to the pure substance. When transferred to substance mixtures, they may only be considered as a guide.
- **Type of material** : NBR (Nitrile rubber)
- **Material thickness** : >0.11 mm
